Radhe Radhe, Bhaktapur, Nepal

[linkedin.com/in/bibek](https://www.linkedin.com/in/bibek)

Frontend Developer specializing in the modern JavaScript ecosystem. Proven ability to build, deploy, and maintain full-stack applications, demonstrated through a portfolio of projects including a social media platform, a real-time chat service, and a weather forecasting app. Passionate about creating intuitive, responsive, and performant user interfaces from concept to production.

PROJECTS/EXPERIENCE

SOCIAL MEDIA (NEPABOOK)

- **GitHub:** <https://github.com/DEVELOPERBibek10/Social-Media>
- **Demo:** <https://social-media-zsr5.vercel.app/>
- Developed a full-stack social media application using React, Redux Toolkit, React-Hook-Forms and React Query for efficient server-side state and data management.
- Implemented a scalable backend with Appwrite for authentication and database.

WEATHER AND FORECAST APP

- **GitHub:** <https://github.com/DEVELOPERBibek10/Klimate-Weather-App>
- **Demo:** [https://bibek-klimat.netlify .app/](https://bibek-klimat.netlify.app/)
- Developed a Weather and Forecast Application with responsive design using Shadcn UI and advanced server-side state management via React Query.
- Implemented city search with smart suggestions and a favorites list, enabling personalized and persistent user experiences.

Project/Task Management Kanban board App

- **GitHub:** <https://github.com/DEVELOPERBibek10/Pro-Kanban>
- **Demo:** <https://pro-kanban-iota.vercel.app/>
- Developed a front-end only Kanban board application using Shadcn UI, React-Hook-Forms, Redux Toolkit and notably no external libraries for drag and drop feature.
- Implemented global project search feature to navigate between projects and their task.

RELEVANT SKILLS

- HTML
- CSS
- Tailwind CSS
